

# WSDOT Standard Plans

## Metric and English Standard Plans

The WSDOT Standard Plans are engineering drawings that are used for road, bridge and municipal construction. These drawings have been prepared under the direct supervision of a professional engineer, licensed in the state of Washington, who is knowledgeable in the specialized field of civil engineering depicted in that drawing. These plans standardize fabrication, installation, and construction methods for specific items of work and complements the contract documents and the *Standard Specifications for Road, Bridge and Municipal Construction*.

The Standard Plans listed below with their titles in green have been approved since the last CD-ROM was distributed in July of 2001. In the event any of these plan sheets are revised before the next edition of the CD, the new version will be posted at:
